

Test

1 DECISIONS

1.1 REQUEST HANDLING

I used a small list of websites:

www.cnn.com

<http://ece.utah.edu/~ece3530/>

<http://www.cs.utah.edu/~lifeifei/cs5530>

[Getting Started](#)

1.2 THREADING

Using Firefox, I opened multiple tabs as well as connected a telnet client to the server. Each tab was given a different website to load.

1.3 CACHING

I tested caching by loading a webpage again after it had initially been loaded. Server log messages indicate if there was a cache hit or miss.
